ABSTRACT:

PROBLEM TO BE SOLVED: To provide a context <u>information</u> exchange system capable of <u>exchanging context information</u> between a plurality of equipments with a simple structure, a server and a <u>client</u> therefor, a program for execution of a computer, and a computer-readable storage medium.

SOLUTION: In this context <u>information exchange</u> system 100, the <u>client</u> 400 uploads acquired context information with ID information read from an IC tag 600 onto a management table 303 of the server 300 (put-processing). The <u>client</u> 400 downloads context information registered on the management table 303 related to the ID information read from the IC tag 600 (get-processing).
